About Maplelane Golden Retrievers

At Maplelane Golden Retrievers, we endeavour to provide Golden Retriever Puppies that are versatile family companions. In short they will be a loving asset to your family who will always be there for you. They will be entertaining, dedicated and tolerant, seeking and giving affection.

As well as being recognized as an excellent breeding establishment we also provide boarding services with heated indoor and outdoor runs. Our facility also provides excellent obedience classes for all breeds of dogs.

What our dogs do.

Maplelane is a working/competitive kennel with dogs holding titles in obedience, conformation, field (hunting), agility, flyball, canine good citizen testing with several St. John's Ambulance Therapy dogs among our gang.

We also have a Goose Control Company.

Several of our goldens are master goose control dogs.

Because all of our dogs have jobs it allows us to determine breeding partners for greater success in establishing the perfect golden temperament.

Genetic Testing

Our puppies are home raised with imprinting exercises beginning at 2 weeks of age. All of our breeding stock have received their clearances for hip dysplasia, eye and heart abnormalities as well as V.W. and thyroid.

Temperament testing has been done on all current breeding stock. We take our breeding program very seriously and want to be guardians of this wonderful breed.

Maplelane Golden Retrievers will be provided the following two year guarantee on each puppy sold:

- 1) Free of hereditary eye cataracts.
- 2) To be of sound temperament upon departure from our home.
- 3) Free of congenital heart disease, as determined by an ultrasound.
- 4) Free of hip dysplasia.

Your Puppy Package

After initial interviewing, we establish which litter would be best suited for your family and then begin the waiting game. Once the female has been bred we will notify you of the expected due date. After the puppies are born we hold 2 open houses; when the puppies are two weeks old and again when they are four weeks old. Your third visit will be to pick up your puppy, where we provide you and your new puppy with a 2 hour training session, a complete history of your puppy along with their first bag of food and vet inspection which includes an up to date immunization and worming program.
