*Shereldean
Shepherds
Reg'd.*

We at Shereldean, are dedicated to producing healthy, happy, puppies.

Our dogs and a cat named Sonny, all share our home with us.

None of our four-legged kids are kennel dogs.

For safety and peace of mind, indoor runs were constructed to house the dogs in our absence. This way, we are assured our house won't look like a child's playground when we return. Of course, there are the little gems who can do no evil and their job is to guard the house from bad guys during our absence.

Shereldean was established in 1974. We just love the versatility of the breed. Starting out in obedience, we just started showing in the conformation ring in about 1988. We have guided the girls in the production of some very nice puppies.

At least that is what we have been told....VBG

All our kids go to their new homes with their first vaccinations, micro-chipped, vet checked and de-wormed. We are a phone call away for the life of the puppy. We like to keep in touch, and offer any assistance we can, advice or otherwise.

The most important thing is the puppies have a wonderful home and life. Thus even the best show quality can end up in a pet home which is great.

We strive to produce good quality show specimens, but our main priority is to produce wonderful companions for individuals and family's to enjoy for a lifetime.

As you can see our kids are all run together. At the time of this brochure we have 4 adult males and 4 adult females and one puppy all running together.

We will not have kennel dogs, if they can't all get along, then the individual is placed in a loving family home where he/she is the only dog that can get all the attention. That is usually the only time we have older dogs available to pet homes, or maybe that lovely show prospect just didn't turn out.

As you can see we usually have a variety of colours in our home.

Visitors are welcome to come and see the "Gang" and their surroundings.
